

Naomi Johnson

San Francisco Bay Area | UXRnaomi@gmail.com | (pw: userresearch) naomi789.pythonanywhere.com/

Senior UX Researcher and former software engineer passionate about uncovering the “why” behind user behavior in complex domains like AI, cybersecurity, and data visualization. I use qualitative and mixed methods to generate insights that align teams and guide strategic, user-centered product decisions.

SKILLS

Qual methods: usability, user interviews, participatory design (card sorting, concept testing)

Quant methods: intercept testing, surveys, benchmarking, statistics (t-test, ANOVA, etc.)

Tools: Recruitment and interviews (Respondent, UserTesting), surveys (SurveyMonkey, Qualtrics), analytics (MixPanel, Google Analytics), analysis (Python, R, Excel, Airtable)

WORK EXPERIENCE

UX Researcher at GreatSchools.org

Jul 2023 – Jun 2025

- *Reduced misclassification errors by 40%* and improved navigation on school profiles by refining the taxonomy through five rounds of card sorts and tree tests.
- *Increased engagement time by 12.9% YoY* on school profiles and reduced user misunderstandings by 80% by justifying a new design based on interview insights.
- Increased self-initiated research by 30% by democratizing research by leading cross-team workshops and creating templates for recruitment, interviews, A/B tests.
- Set an annual research roadmap and drove alignment across product teams by synthesizing user research into actionable personas and success metrics.
- Created a research repository to streamline access and reduce redundant requests.
- Managed a UX Research Intern, guiding product analysis that shaped our roadmap.

UX Researcher at GitHub

Apr 2022 – May 2023

- *Drove a 5% increase in resolved security alerts and increased user satisfaction* by recommending [pausing alerts](#) for inactive users and [increasing alert visibility](#) for active users after uncovering friction during interviews on user groups and user journeys.
- *Improved comprehension by 40% and increasing task completion by 25%* after persuading stakeholders to change content after uncovering confusion around critical instructions to [prevent security leaks](#) during usability testing.

UX Researcher at Groupon

Jan 2021 – Apr 2022

- *[51% increase in local units sold](#)* in North America after sharing insights from usability tests about a new homepage guiding users toward local categories.
- *Boosted search accuracy and click-through rates* by leveraging Python to analyze NPS scores; uncovering insights that drove a [new search & ranking algorithm](#).

EDUCATION

Master's in Human-Centered Design Engineering (HCDE), University of Washington

- HCDE “[Academic Excellence](#)” award; [Women Engineers Rise's](#) “Honored Graduate” award.

Bachelor's in Computer Science and Japanese, University of Virginia

- Research intern at Adobe, Stanford University; software engineering intern at Microsoft.
